Sandhurst Camera Club

Aide-Mémoire

Projected Digital Images

**PDI competitions**

**(This also applies to PDI copies of submissions to PRINT competitions).**

**NOTE: The deadline for submission of images is Midnight on the Saturday before the competition. Images received later will not be accepted.**

Each member may submit up to three images of which only the two highest scoring will count to internal PDI League Table scores.

**After editing and BEFORE you resize the image save it as a Tiff file. This can then be used, if chosen by a selection panel, to be printed for an external PRINT Competition and the Annual Exhibition.**

Resizing should be the last action in the editing process, except for placing a 1 - 3pxl keyline around the image. This ensures that the projection onto the screen is the largest possible.

Save the final PDI Image as a .jpg. The size must be a maximum of 1600 pixels wide or a maximum of 1200 pixels high. See the SCC website for more information.

When you resize your image check both the height and width and if the height exceeds 1200 pixels change it to 1200, which will alter the width accordingly.

*If unsure about resizing, please contact Keith Taylor or a committee member.*

**Images must be in .jpg format & sRGB colour space.**

*If unsure about colour space, please contact Keith Taylor or a committee member.*

**The software requires filenames to be in the following format:**

**Title - Name**

*e.g. Red Ball - Joe Bloggs*

**The 3<sup>rd</sup> image should be a reserve (which may not be used) and titled as follows:**

*e.g. Red Ball – Joe Bloggs Reserve*

**Please take time to learn how to title and resize your images – an incorrectly sized image may not project correctly or be pixelated.**
